

# chromium

aluminum trailer wash

**element series** consists of specialty products formulated to offer effective and safe solutions for customers' unique cleaning needs. For each solution developed another 'element' is added to the series. Providing our customers with the right solution for each task.

**Chromium** is a heavy duty alkaline cleaner for use on unpainted aluminum, painted aluminum, and fiberglass trailers. It's formulated with a concentrated blend of detergents, emulsifiers, alkaline builders and water softeners to effectively clean trailers while brightening aluminum surfaces.

## features

- As a heavy duty concentrate it must be diluted by at least 12 to 1 and as much as 120 to 1 with water, depending on degree of soil and cleaning method.
- As an extremely powerful cleaning formula it cleans remarkably well both painted and unpainted aluminum surfaces
- Can be used in automatic wash systems as well as in high pressure sprayers.
- When used as directed it brightens aluminum beautifully without resorting to products containing fluoride compounds which are both toxic and etch or frost glass.

**Caution:** Must carefully follow directions on container. Long contact time and/or excessive product concentrations can lead to pitting and etching of aluminum. Do not use on highly polished aluminum or on automotive finishes.

## ideal for

Washing trucks and trailers in automatic wash systems or high pressure sprayers.

## optimal applications

Truck washes, professional truck washing services and truck rental/leasing facilities.

## product specifications

Physical Description	Clear Liquid
Viscosity	Water Thin
Color	Dark Brown
Flashpoint	None
Fragrance	Bland
Weight per Gallon	9.82 lb / gal
pH (1%)	12.6 - 12.8
Storage Stability	1 year minimum
D.O.T. Shipping label	UN3266, Corrosive

liquid, basic, inorganic, n.o.s. (sodium hydroxide), 8, PG II
